

3-5 May 2019

Du Boisian Scholar Network Second National Convening

At Brown University on the land of the
Narragansett and Wampanoag Tribes

The Negro race has been the foundation upon which the capitalist system has been reared, the Industrial Revolution carried through, and imperial colonialism established. If we confine ourselves to America we cannot forget that America was built on Africa. From being a mere stopping place between Europe and Asia or a chance treasure house of gold, America became through African labor the center of the sugar empire and the cotton kingdom and an integral part of that world industry and trade which caused the Industrial Revolution and the reign of capitalism.
